

Play Surfacing

Pentagon
For Learning and Play

Saferturf

Saferturf is an all weather play surface which adds colour and design to play areas, while brightening up the overall appeal and stimulating children. It can be laid over tarmac to soften the surface or over grass to improve the usability of the area as rainwater drains through into the ground. Gone are the muddy shoes and uniforms bringing dirt back into the classrooms.

The wide variety of colours allows endless opportunities for design which can incorporate games and curriculum topics as well as scenes from the sea/train station/roads.

- ✓ All weather play
- ✓ Soft surface
- ✓ Educational design options
